Daniyal Jumshaid

(Final Year Student of Computer Science)

Phone No.: +92 330 4795104 | **Email:**daniyaljumshaid74@gmail.com | **LinkedIn:**linkedin.com/in/daniyaljumshaid | **Github:**github.com/daniyaljumshaid | **Portfolio:**daniyal-portfolio.vercel.app

PROFESSIONAL SUMMARY:

Motivated and detail-oriented computer science student seeking a full-time job opportunity at a dynamic software house. Eager to apply programming skills, problem-solving abilities, and theoretical knowledge to real-world projects. Looking forward to collaborating with experienced professionals, gaining hands-on experience in software engineering, and contributing to innovative solutions.

EDUCATION:

- Bachelors in Computer Science | University of Engineering and Technology, Lahore | *2023 – 2027*
- Faculty of Science (Pre-Engineering) | Punjab Group of Colleges, Lahore | *2021 – 2023*
- Matriculation (Computer Science) | The Punjab School, Lahore | *2019 – 2021*

TECHNICAL SKILLS:

- **Programming Languages:** C++, HTML, CSS, JavaScript, React JS, Node JS, MongoDB, SQL
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Systems, Programming Fundamentals, Web Development.

PROJECTS:

Surplus Space AI-Gated Marketplace for Surplus Construction Material:

Final Year Project (In Progress, 4-member team)

Technology: Flutter, ASP.NET Core, PostgreSQL/PostGIS, SignalR, Python, FastAPI, PyTorch, CLIP, YOLO, XGBoost

- Building a three-role marketplace (Admin, Customer, Contractor) where every listing is automatically screened by an AI pipeline before publication.
- Pipeline combines zero-shot material classification (CLIP), material-specific defect detection (YOLO), a condition-grading engine, description-photo consistency checks, and fair-price estimation (XGBoost).
- Prototype CLIP classifier reached 95% accuracy on an internal test set; YOLO prototype detected defects such as rust stains and exposed reinforcement on real validation images.
- Designed a decision engine that auto-publishes clean listings and routes uncertain ones to an Admin review queue, plus real-time chat and an LLM-based listing assistant that answers only from listing data.

MERN E-commerce Platform:

Technology: React JS, Node.js, Express.js, MongoDB

Concepts: Full-Stack Web Development, REST APIs, Authentication & Authorization

- Built a full-stack e-commerce web application with product browsing, search, filters, and shopping cart functionality.
- Implemented secure user authentication using JWT and password hashing with bcrypt.
- Created an admin dashboard to manage products, orders, and users with role-based access control.

Personal Portfolio Website:

Technology*:* React JS

Concepts*:* Web Development, Component-Based Architecture

Built a responsive personal portfolio website to showcase projects, skills, and resume.

- Implemented reusable components, state management, and routing for an interactive user experience.
- Deployed full-stack application live via
