PROFESSIONAL SUMMARY:

Motivated and detail-oriented computer science student seeking an internship opportunity at a dynamic software house. Eager to apply programming skills, problem-solving abilities, and theoretical knowledge to real-world projects. Looking forward to collaborating with experienced professionals, gaining hands-on experience in software engineering, and contributing to innovative solutions.

EDUCATION:

- Bachelors in Computer Science | UET Lahore | 2023 – 2027
- Faculty of Science (Pre-Engineering) | PGC, Lahore | 2021 – 2023
- Matriculation (Computer Science) | TPS, Lahore | 2019 – 2021

TECHNICAL SKILLS:

- **Programming Languages:** C++, HTML, CSS, JavaScript, React JS, Node JS, MongoDB, SQL
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Systems, Programming Fundamentals, Web Development.

PROJECTS:

MERN E-commerce Platform:

Technology: React JS, Node.js, Express.js, MongoDB

Concepts: Full-Stack Web Development, REST APIs, Authentication & Authorization

- Built a full-stack e-commerce web application with product browsing, search, filters, and shopping cart functionality.
- Implemented secure user authentication using JWT and password hashing with bcrypt.
- Created an admin dashboard to manage products, orders, and users with role-based access control.

Personal Portfolio Website:

Technology: React JS

Concepts: Web Development, Component-Based Architecture

- Built a responsive personal portfolio website to showcase projects, skills, and resume.
- Implemented reusable components, state management, and routing for an interactive user experience.
- Deployed online to demonstrate full-stack deployment skills.

Hospital Management System:

Language: C++

Concepts: Data Structures & Algorithms

- Developed a hospital management system with efficient patient record handling using linked lists and trees.
- Implemented optimized search and sorting algorithms for quick data retrieval.

School Management System:

Language: C++

Concepts: Object-Oriented Programming (OOP)

- Designed a comprehensive system to manage student and staff records.
- Utilized classes, inheritance, and polymorphism for modular code structure.

Hotel Management System:

Technology: SQL

Concepts: Database Systems

- Built a database system to handle room bookings, customer details, and billing.
- Designed and optimized SQL queries for efficient data retrieval and management.

Car Management System:

Language: C++

Concepts: Programming Fundamentals

- Engineered a CRUD-based system to store, update, and delete car records.
- Implemented file handling and basic user interaction features.

LANGUAGES:

- Urdu
- English
